## Pre-Cut Pads & Bulk Media

B.C. Air Filter carries and utilizes the finest filtration materials available. Synthetic and fiberglass medias are available in pre-cut pads or bulk rolls. Applications include residential use, commercial prefiltration, paint arrestance, and even odour control. B.C. Air Filter stocks more than twenty various types of filtration media to ensure you get the right product for the application.

## Disposable Panel Filters—TA Series

TA Series filters are available with synthetic or fiberglass media in a variety of efficiencies. Our 1" filters utilize mechanically fastened pinch frame construction with "bottlecapping" to prevent blowout. 2" filters predominantly use the same high-strength Die-Cut frames our pleated filters use. B.C. Air Filter is one of the only manufacturers worldwide to build to this standard.

## Wire Supported Products

Wire supported products offer unparalleled versatility. B.C. Air Filter manufactures a wide variety of panels and links, in numerous combinations of media, including carbon impregnated medias for odour control. Applications include intake filtration for paint booths, residential furnaces, heat-pumps, commercial HVAC equipment and more. Also available in extended surface cubes for applications requiring extended service life or increased airflow.

## AP-7 Pleated Filters

The B.C. Air Filter AP-7 has become the industry standard in B.C., and for good reason. Manufactured to exacting specifications, the AP-7 provides performance and value. Standard and high capacity models are available in 1", 2" and 4" depths in a variety of standard & special sizes. The AP-7 Pleated Filter achieves MERV 7 (25-30% efficiency) based on the ASHRAE 52.2 test standard.

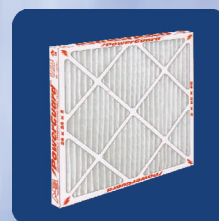

## AP-8 Pleated Filters

B.C. Air Filter is excited to feature our new line of synthetic performance filters. Offering numerous benefits over standard cotton-poly blend medias, synthetic materials are the next step in filtration performance. The AP-8 is available in 1", 2" and 4" depths in a variety of standard & special sizes. The AP-8 Pleated Filter achieves MERV 8 (30-35% efficiency) based on the ASHRAE 52.2 test standard.

## AP-11 Pleated Filters

The AP-11 utilizes a MERV 11 synthetic pleat material. Offering the ultimate in performance, this pleated filter is extremely efficient without excessive restriction to the air. The AP-11 is available in 1", 2" and 4" depths in a variety of standard & special sizes. The AP-11 Pleated Filter is rated at MERV 11 (40-45% efficiency) based on the ASHRAE 52.2 test standard.

## Airpac Extended Surface Bag Filters

B.C. Air Filter manufactures a complete line of extended surface bag filters. The Airpac can be configured to accommodate a wide range of airflows, and is available in a myriad of sizes. Available in depths from 8" to 36" and efficiencies from MERV 11 to 14 (65% to 95% efficiency).

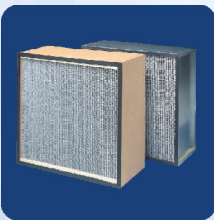

## Rigid Box Filters

Designed for medium to high efficiency applications, rigid box filters excel in variable volume situations. Offering long service life and consistent performance, box filters are available in several configurations to fit your application. Rigid box filters come in 6" and 12" depths and efficiencies from MERV 9 to 14 (45% to 95% efficiency).

## Mini-Pleat Products

B.C. Air Filter's mini-pleat products, such as the MPV Cell, offer incredible advantage over standard box filters. With vastly lower initial resistance and increased service life, many customers are realizing savings of up to 50% over their previous filters. Available in various configurations in 4", 6" and 12" depths and efficiencies from 45% ASHRAE to 95% DOP.

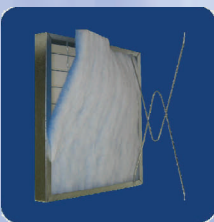

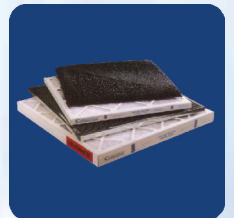

## HEPA & ULPA Filters

HEPA & ULPA filters must provide dependable, consistent performance. For that reason, B.C. Air Filter represents only the best names in the industry; companies with a history of quality and reliability. Products range from commercial and industrial class filters, to those specifically designed for cleanrooms and pharmaceutical manufacturing. When it must work, people know B.C. Air Filter is the company to call.

## Odour Control Filters & Bulk Carbon

B.C. Air Filter carries a wide variety of gas-phase adsorbers for odour and VOC control. From light-duty residential products and heavy-duty commercial cells, to bulk activated carbons and impregnated materials, B.C. Air Filter ensures you get the right product for the job. For industrial customers, we also offer testing and products for corrosion monitoring. Carbon filter housings for new construction are available in both front & side-access configurations.

## Holding Frames & Latches

Mark 2 Media Holding Frames are designed to accommodate pre-cut media pads. Any number of filtration medias can be utilized to achieve the exact results desired. From light particulate filtration to odour control, B.C. Air Filter uses industry proven filtration medias for dependable performance and consistent results. B.C. Air Filter also stocks universal holding frames and latches for build-up filter banks.

A Canadian owned and operated company, B.C. Air Filter has been manufacturing filtration solutions since 1964. With peerless experience in custom design and fabrication, B.C. Air Filter offers the right product for your application—guaranteed. Our reputation stems from our ability to create unique and well-tailored filtration products that achieve the results you need.

We represent industry leading companies for all our filtration products. Although our focus is on the HVAC products that we manufacture, we do employ specialists for liquid, hydraulic and process filtration, as well as dust collection and pollution control systems.

#### General Product Lines:

- Residential HVAC Filters (Pads, Disposables, Pleated, Electrostatic and Electronic)
- Commercial HVAC Filters (Washables, Pleated, Box Filters, Bag Filters, HEPA Filters)
- Industrial HVAC & Dust Collection (Premium Pleated, Cartridge Filters, Process Filtration)
- New Construction (Universal Frames, Filter Housings, Cleanroom Products)
- Odour & Chemical Remediation (Activated Carbon, Zeolite, Specialty Filters)
- Autobody & Paint (Crossdraft, Downdraft, Paint Arrestors, Andrea Binks Style)
- Liquid Filtration (Fuel, Oil, Hydraulic, and Water)
- Air Measurement Equipment (Balometers, Anemometers, CO<sup>2</sup> Meters)
- Coil Cleaners & Chemicals

B.C. Air Filter endeavours to offer the best service, value, and cost-savings through quality, efficiency, and breadth of product line.
