

Mark 2 Media Frame

Media Pad Holding Frames

- High Strength Galvanized Steel
- Hinged Gates
- Heavy-Duty Mesh Downstream
- Mitred Corners Ensure Square
- Special Sizes Manufactured Daily
- Other Materials of Construction Available

Manufactured as an economic alternative to our TA Series, the MK2 Media Frames can lower annual filter purchase costs by up to 50%!

Versatility – The primary advantage of the Mark 2 Frame is its versatility. Any number of filtration medias can be utilized to achieve the exact results desired. From light particulate filtration to odour control, B.C. Air Filter uses industry proven filtration medias for dependable performance and consistent results.

Construction – For areas with moisture concerns or other harsh conditions, the Mark 2 Frame provides years of service due to its high strength galvanized frame and welded construction.

Performance – The drawback with disposable panel filters is the difficulty in preventing bypass of dirt-laden air. B.C. Air Filter's Mark 2 Frames can be ordered with gasketing factory applied, preventing bypass and ensuring good filtration. Gasketing is applied for either side-access or face-load configurations.

Selection – B.C. Air Filter stocks large quantities of standard size Mark 2 Frames for quick turn-around. Have a non-standard size requirement? No problem. Subtract 1/2" from your overall track or frame size, and give us your exact dimensions. Not sure which filtration media you need? One of our experienced sales staff will be happy to discuss your requirements.
